Economists measure wealth and poverty in several ways. The three most common measures are income, assets (meaning accumulated wealth in the form of money, securities, and real estate), and socioeconomic metrics. Measures in the last category go beyond financial data to account for health, nutrition, infant mortality, sanitation, and other aspects of human well being.

Wealth and Poverty: What Is Poverty?

His explanation of the wealth and poverty of nations is simple: rich nations are once-poor nations that developed market economies; poor nations are once- and still-poor nations that did not. Market economies require governments that do not interfere with people's economic affairs except to protect property rights. Landes builds his case by ...
